

# Припой для пайки меди Soldering paste for copper profiles Cynel-SnCu3

12 June 2010

**БелТерраТранс**-официальный торговый партнер  
Cynel Unipress в России и Беларуси.

## 1. General characteristics

The paste is intended to be used for cold and hot water installation soldering.

Flux rests after soldering are 100% water washable

## 2. Instructions for use

Stir the paste precisely before using. If the paste is thickened, add few water drops and stir precisely.

Clean pipe ends, apply "Cynel-SnCu3" paste, join and heat the ends until additional soldering wire is melted and the gap is filled with the solder.

Soldering rests should be removed with a moist rag.

According to proper rules, pass water through the pipeline, in order to remove soldering rests inside the pipeline.

Ensure proper ventilation of the work place!

In order to make a joint, use Cynel SnCu3 soft solder

## 3. Packaging

3.1 Plastic container of 250 g.
